## Astounding Zakouma with Ant Kaschula

*For the true nature and wilderness enthusiast, Zakouma National Park is one of Africa's absolute 'must see' destinations that is truly beyond compare. Nowhere else comes close in being able to offer the sheer abundance and diversity of mammal and birdlife found here and many visitors to this extraordinary destination will come away with their senses having been totally overwhelmed.*

*Owing to its remote location, it is not easy to get to and perhaps this alone results in the park remaining so beautifully wild and untouched.*

*No other birding destination in Africa can hold a candle to Zakouma and birding here is truly in a league of its own. The park's bird list totals 395 species, many of which are seen in numbers unlike anywhere else in Africa. The most avid of birders will likely notch up dozens of new species with the likes of Black-breasted Barbets, Egyptian Plovers, Clapperton's Spurfowl, Black-headed Gonolek, Stone Partridge, Little Green, Red-throated & Northern Carmine Bee-Eaters and Black Crowned Crane being just some of a long list of 'specials'!*

*On the mammal front, even the most well travelled will encounter new species or sub-species of several large mammals including the likes of Buffon's Kob, Lelwel's Hartebeest, Tiang, Red-fronted Gazelle, Kordofan Giraffe, Western Roan, Harnessed Bushbuck, Bohor Reedbuck, Central African Savanna Buffalo, Tantalus and Patas Monkey and Pale Fox. Predators are also found in healthy numbers with Lion, Leopard, Cheetah, Painted Hunting Dogs, Spotted and Striped Hyena all being present in the park.*
