

# Expedition Itinerary

## Lakes & Rivers with 16 Degrees South

*A combination of two iconic safari destinations, both centred around the waters of the great Zambezi River – the secluded shorelines of Lake Kariba and the floodplains of Mana Pools. Explored over a total of 8 nights with 3 nights in each National Park and a mid-safari traditional camp stop. This is a safari brimming with diversity of landscapes and natural beauty.*

*Hosted in an exclusive and private concession in the Gubu River, on the western boundary of Matusadona – this unique location allows for a combination of water and land-based exploration in a remote setting. We will explore the many bays and inlets of Lake Kariba, walk the rivers that descend from the escarpment and sit in pop up blinds above springs and seeps and enjoy a sunset cruise on the waters of the Ume River.*

*We end off your stay in Matusadona with 2 nights at Changa Safari Camp – on the eastern shores of the park, while the expedition team and vehicles board a ferry and cross the wide expanse of Lake Kariba's eastern basin, heading to Mana Pools for the next stage of your expedition.*

*The same familiar camp is waiting for you in Mana Pools, providing the perfectly acquainted base from which we will explore the iconic floodplain and albedo forests of Mana Pools and the magnificent river that is the Zambezi.*

# Expedition Itinerary
